

## Make a symmetrical drawing like **Anasazi Thomas!**

**Anasazi Thomas** uses *symmetry* in her black and white print-made images. She uses the shapes of many tiny individual things to make new, larger images. She also uses *symbols* to help her tell stories and add meaning.

- **Take** a piece of tissue paper and fold it in half.
- **Draw** shapes and symbols like crescents and diamonds to make a composition using a black sharpie.
- **Flip** it over to trace what you created on the first side, then open it up to see the symmetry you created!
